HARSHADA SADANAND WAYKAR

Python Developer | Backend & Cloud Engineering

harshadawaykar53@gmail.com | +91 8097370817 | Pune, Maharashtra | GitHub | LinkedIn | FlavorAI | Tech India Website | Portfolio

PROFESSIONAL SUMMARY

Python Developer with hands-on experience in Django REST Framework, secure REST API design, and LLM-integrated backend systems (Google Gemini API, Groq AI SDK, Llama 3). Skilled in building production-style, full-stack applications with authentication, database integration, and role-based access control, and in applying cloud and DevOps practices for scalable, secure deployments. Adaptable to enterprise engineering environments and cross-functional delivery.

CORE TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, HTML, CSS, React.js

Backend & APIs: Django REST Framework, Flask, FastAPI, Next.js 15, REST API Design, JWT Authentication, NextAuth.js, RBAC, OWASP Security Practices

Databases: MySQL, MongoDB, DynamoDB, RDS

AI/ML Integration: Google Gemini API, Groq AI SDK, Llama 3, Generative AI, Prompt Engineering, AI Agents and MCP

Cloud & AWS: Boto3, AWS Lambda, API Gateway, EC2, ECS, EKS, S3, SQS, SNS, EventBridge, Step Functions, IAM, KMS, Secrets Manager, CloudWatch, CloudTrail, AWS Cost Explorer, CUR

Infrastructure & DevOps: Terraform, AWS CDK, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Linux

Tools & Platforms: Git, GitHub, VS Code, Pandas, NumPy, Figma, Postman, Vercel, Render, Google Maps Integration

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — Tech India Website (Client Project) Since Aug 2026

- Designed and delivered a professional dual-division business website for Tech India Mini Wind and Tech India NDT & Engineering Services.
- Built a responsive React-based frontend with modern UI/UX, business-specific landing pages, and interactive sections.
- Implemented backend and API functionality, contact and career forms, Google Maps integration, and click-to-call/email interactions.
- Managed the full development lifecycle — development, testing, and production deployment — using Git/GitHub, Vercel, and Render.
- Delivered as a client-facing engagement with emphasis on usability, responsive design, and long-term maintainability.

KEY PROJECTS

FlavorAI — AI-Powered Recipe Recommendation Platform Final Year Project

- Engineered an AI-powered recipe recommendation platform using Python, Django, React.js, and Google Gemini API.
- Integrated Generative AI to produce personalized recipes and cooking instructions from user-provided ingredients and preferences.
- Designed RESTful APIs, implemented JWT-based authentication, and managed application data using MySQL.
- Developed a responsive, component-based frontend and maintained version control with Git and GitHub.

EDUCATION

Savitribai Phule Pune University (SPPU) 2026

B.Sc. in Computer Science — CGPA: 8.67 / 10
